

BIZZOTTO®

Ode to Beauty.

Dedicated to this sublime Borgo
and to beauty, absolute and eternal
value that guides our actions.

The Borgo tells its story.

The narrow roads of Asolo tell the story of a gorgeous place, of poetry and silence, of life and history. It is a joy to walk up and down these narrow roads. The castle that can be seen, perched at the top of this Borgo, was the home of Caterina Cornaro, Queen of Cyprus. And just a few kilometres from here, the Bizzotto collections are designed and created according to the indissoluble rules of Italian goldsmithery.

The tale

Art inspires art.

From the Castle, the eye is drawn to the hills, captivated by an ancient and eternal landscape. Here Pietro Bembo wrote “Gli Asolani”, Lorenzo Lotto and Giorgione captured the beauty of the countryside on their canvases, producing new art from the art of this Borgo.

Eleonora Duse, “La Divina”, loved it so much that she chose to live here. There are many memories in the beauty of Asolo, and yet, when we lift our eyes to take in its history we feel a strong sense of its connection to the future, once again and forever made of creativity and splendour.

Although Asolo is contained within ancient walls, its confines are made endless by its very beauty, capable of powerfully combining nature and art.

When we create our collections, it is this union that enters magically, drawing inspiration for new forms, ancient harmonies and unprecedented goals.

An ode to colours.

In a central position of the Borgo, Villa Freya is a treasure within the treasure. At one time inhabited by the British explorer and writer Freya Stark, its grounds contain the remains of a Roman theatre, dating back to the 2nd century BC.

It is this marvellous play of shadows and colours, of hornbeams, English roses and ancient holm oaks, that draws our eye to the breathtaking view of the Castle.

Collections.

Blink

Blink

Blink is the movement
of form that creates
beauty.

The story of Blink starts from simple chain links that offer a creative provocation: that of never breaking the regularity and rhythm of the design. It is an ambitious desire brought to life through craftsmanship and futuristic experimentations.

Blink

We wanted each length to be a unique production and the closure to be an integral part of the link. We wanted to create an indissoluble “Link” that would forever carry the B of Bizzotto.

Nebu

The sublime enchantment of Nebu.

Nebu is an ancient Egyptian sign indicating gold, a metal that was considered indestructible and heavenly. In this definition we find the expressive force, the value and the beauty of a collection that pays homage to the classic plate working techniques.

Nebu

In Nebu, each single piece is made by the same goldsmith, to guarantee the consistency and uniqueness of the finish: working with two different burins, they are able to create an exclusive, satin and bright finish.

Flow

Flow

Flow, the new era of the tennis bracelet.

Diamonds and gold merge, designing a new era of a timeless icon: the tennis bracelet. The elasticity that fully embraces Flow becomes the new must-have.

The mechanism is completely invisible to the eye to further enhance the free flow of light and flexibility of the surface. The sense of freedom is extraordinary, as is its contemporary “easy to wear” essence.

Papercclip

Paperclip

Timelessness and originality in Paperclip.

Starting from a shape that brings to mind the classic office paperclip, this collection invites us to discover a new definition of dynamism.

Paperclip

The rhythm of solids and voids created by the gold is interrupted by an original play in which the diamond is the protagonist: free to slide within the space designed by the shape, here it finds the best place to release its light. It is the timelessness of the material that reveals to the eyes its innate creativity.

Heritage

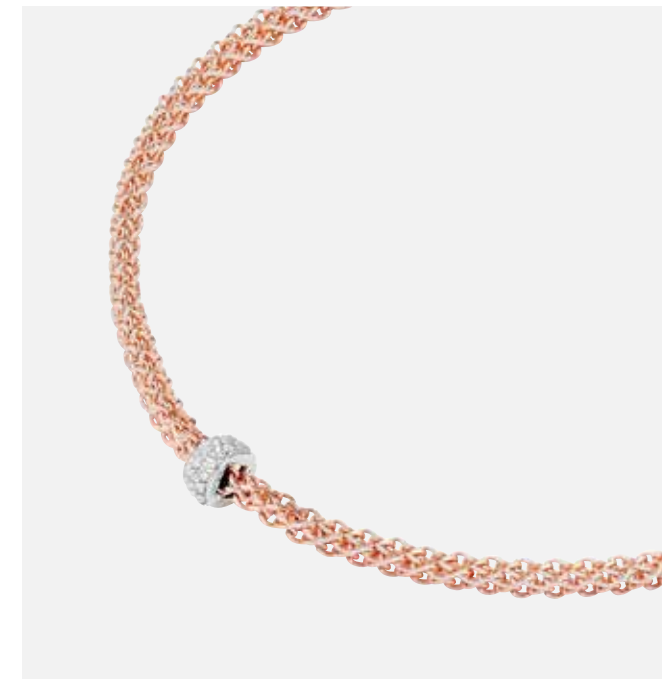

Heritage

Heritage, the rhythm that made history.

The design of Heritage belongs to the history of Bizzotto. It is the ancient knowledge and the timeless dream, both synthesized in the visual musicality of this collection.

To create each single piece in this collection we borrowed from our archives: ancient skills, unique techniques, machines that, just as us, project our past into the future of the jewel and into the present of an enchanting collection.

Bagueette

Baguette, the elegance
that made history.

“Elegant” is the place of balance, of absolute proportions; it is the adjective that defines the choice of simplicity when complexity adds nothing.

Baguette

Baguette honours the classic cut, elegant by definition. Its story is told in its extremely well-balanced long central face, which surrounds a very pure stone, also perfect in its proportions.

Ode to Beauty.

Facebook: [BizzottoGioielli](https://www.facebook.com/BizzottoGioielli)

The origin of Bizzotto Gioielli was a 50-year-old dream. Cesare Bizzotto, a young goldsmith, really wanted to create a brand of high-end jewellery, a brand which would be strongly tied to his family name. His ideas, his heart and his hands moulded the first, unforgettable “collection”. In time, Cesare’s craftsmanship skills and his experience as a goldsmith grew together becoming the creative force behind his other historical collections. It was in that precise moment that the dream took on the name Bizzotto Gioielli: a brand, but even more so, an artistic place where the family history and that of these “unique pieces” blend together guided by harmony, unity, and beauty in search of the extraordinary. Jewellery has no time barriers, it is captivated by the movement that reverses fluidity as a creative expression of the material and its light. It loves inspiring life, moving as we move, yesterday and always. Its extraordinary is in our life.

The experience and history of Bizzotto Gioielli can be told in its signature of absolute purity: a crowned “B”, finely engraved in every piece of jewellery in memory of the founder’s dream, the beginning of it all. “B” is the initial that shows the artistic journey of a family, of a place where the knowledge and research of a brand which gives an antique art a modern twist are symbolically entwined and remembered. Cesare’s children, Martina and Mauro, and his son-in-law Alberto, joined the company twenty years ago and shared Cesare’s vision and the values of the brand which he wanted to represent with that “B”. Their new and avantgarde look at the product and brand contributed to the international identity of Bizzotto Gioielli, synonymous world-wide with a beauty which comes from its past and goldsmith roots.
