

ABOUT US

Dianco is a family-owned diamond business spanning three generations and over 70 years of expertise. Our integrated approach covers rough sourcing, manufacturing, and polished sales. With access to the world's largest mines, we ensure that our entire pipeline is sealed and traceable, from rough to polished diamonds.

SOURCING & MANUFACTURING

Dianco responsibly processes diamonds in partnership with sustainability-focused miners such as Rio Tinto and De Beers.

We manage in-house factories in India, Botswana, and Namibia, where all rough diamonds are tracked through cutting, polishing, and to the final product.

OUR DIAMONDS

Dianco offers a wide range of certified and non-certified diamonds, from melee to larger stones, including rounds and fancies.

COMMITMENT TO SUSTAINABILITY

Dianco is aligned with global sustainability standards, including the Responsible Jewellery Council (RJC), Watch and Jewellery Initiative 2030 (WJI), and De Beers' Best Practice Principles (BPP).

We actively contribute to community development, job creation, healthcare, and education, with a focus on supporting women through childcare provision and equal opportunities in our factories.

TRACEABILITY & PROVENANCE

We are proud to be members of iTraceit and Tracr, employing cutting-edge blockchain and cloud technologies to help customers trace the journey of their diamonds from the mine to their jewellery.
